Oluwamuyiwa Ajibodu

Software Development Student | Ontario, Canada | majibodu25@gmail.com
GitHub: github.com/aajibodu-wq

PROFESSIONAL SUMMARY

Software Development student at Mohawk College with an interest in building practical, user-friendly software. Developing skills in web technologies, programming fundamentals, relational databases, version control, and Linux command-line workflows. Also brings hands-on church media experience in graphic design, projection, and audio mixing.

TECHNICAL SKILLS

Web development: HTML, CSS, responsive layouts, accessibility fundamentals

Programming: C# and programming fundamentals; exposure to Java, PHP, and JavaScript

Databases: SQL queries, relational database concepts, MySQL coursework

Tools: Git, GitHub, Linux/Bash, development environments

UI / UX: Interface structure, prototyping, usability feedback, content organization

Media: Graphic design, projection/display operation, audio mixing

EDUCATION

Mohawk College — Software Development, Program 559

St. Joan of Arc Catholic Secondary School — Secondary School Education

SELECTED PROJECTS

CampusCrave — Student Food Discovery | Academic design project

Concept for helping students compare campus meals by budget, dietary needs, availability, wait levels, and student deals; focused on user flows, filters, and quick-pick usability.

Git Branching & Merge Workflow | Coursework

Practised creating a repository, committing changes, using a feature branch, merging changes, and reviewing commit history from the Linux command line.

WordPress Mock-Client Website | Coursework

Worked on website content structure and visual consistency for a mock client, with attention to navigation, styling, and content-management usability.

Inventory Tracker Database | Proposed practice project

Concept for tracking stock quantities and identifying low-stock items with SQL queries. Build and test before listing as a completed project.

StudyFlow Planner | Proposed practice project

Concept for organizing assignment deadlines and breaking larger tasks into manageable steps. Build and test before listing as a completed project.

Library Checkout Manager | Proposed practice project

C# console-app concept for representing library items and tracking checkout status, to practise classes and validation.

ADDITIONAL EXPERIENCE

Christ Embassy — Church Technical Department / Media Team

• Created graphic designs for church communications and media.

• Operated projection/display content during services or events.

• Supported audio setup and mixing to help deliver clear sound during services or events.

PROFESSIONAL STRENGTHS

Problem-solving • Willingness to learn • Attention to detail • Team collaboration • Organized approach to tasks

Resume draft — verify that all skills and responsibilities accurately reflect your experience before submitting or applying.
